Wayzata Everbearer

**THE HONEY-SWEET BERRY
RED TO THE HEART
SMALL HULL—NO GREEN TIPS
DISEASE FREE
THREE CROPS IN 18 MONTHS
SWEET AS SUGAR**

Wayzata challenges the world in size and productiveness. Will bear three crops in eighteen months. The plants will start to bear fruit in 60 to 90 days after setting. Wayzata adapts itself to the widest range of soils of any variety. It does excellently in a heavy clay soil, has given fine results in muck bottom lands, and, of course, never fails on sandy and sandy loam soils. Will even give satisfactory results in the lightest of yellow sand, with a little fertilizer added to the soil before setting. It is hardy and tough. Has stood 40 degrees below zero without injury. It seems that diseases and insects just do not like the Wayzata plants. Their dark green, leather-like leaves are very rarely attacked by any of the common Strawberry diseases or enemies.

In drought-resisting, Wayzata does as well as Senator Dunlap. Wayzata makes very few runner plants, but makes stools of suckers that will also bear fruit. It is too busy making fruit buds and new stools. I have counted over 20 fruit stems on a single plant, and still more were coming out. The plant will be just loaded with ripe berries, green berries, blossoms and buds. This is continuous from July to winter. The very reason that Wayzata plants are listed higher than other varieties of Strawberries is that even with our scientific method of growing Wayzata **for plants only**, we have difficulty growing enough plants to supply the demand.

For the last several years we have been offering Wayzata Clump plants. Clump plants are the mother plants that failed to shoot out any runners. Instead the mother plants just sent up shoots, off the side, and each shoot being a perfect new Strawberry plant. Now it seems that these clumps are too large to stand transplanting, and too many unsatisfactory results have been obtained when these large clumps were set. This is especially true when they are set after April 1st. As we have said before, these shoots are each a new perfect Strawberry plant, so we are offering the divisions this year instead of the clumps. The old mother plant or any part of it will not be used in making these divisions. We are offering them quite a lot lower in price than the strictly one-year runner plants. In our experience, we have found no difference in results when planted side by side.

20% DISCOUNT will be allowed again in Sept., Oct., Nov., and Dec., 1940.

		If we run short of DIVISION plants, your order will be filled with 1-year runner plants.	

IT IS AGAIN my pleasure to present you with my annual catalog which I call **Garden Success**. To make it short, I have the largest stock of plants that I have had in a good many years, and of the highest quality, so I am not going to waste several pages bragging about the quality of them and the valuable space with pictures of tractors, manure spreaders, cultivators, etc. You know these tools and implements are a necessity in growing good nursery stock and that is why we have them. What you are interested in is good healthy nursery stock and plants of all kinds that will grow and produce for you. Our Certificate of Nursery Inspection issued to us by the State of Michigan is your protection as well as ours. All the stock that we have is inspected by the State inspector twice, and sometimes three times before it is shipped.

Your order, whether it be large or small, will be greatly appreciated, and it will be acknowledged promptly by first class mail. Terms are cash with order or one-third cash and balance C. O. D. Later on in the planting season you may wire or phone your order in and it will be shipped promptly C. O. D. for full amount.

If you have the money on hand when this catalog arrives, you can save some money by ordering at once. I am offering you 20% discount for all orders received in January, 15% for all orders received in February, and 10% discount up to April 1st. Don't overlook the nice premiums I am offering for \$5.00, \$10.00, \$25.00 and \$50.00 orders. This stock will be of the highest grade—not a lot of junk we want to get rid of. I want to thank all my old customers and friends who have ordered before. And to you who have never ordered from the South Michigan Nursery, will say that I believe that it will pay you to direct a trial order this way this year. Remember, satisfaction guaranteed. Any one who receives this catalog after above discount dates will have 10 days to take advantage of the 20% discount. 20% discount will be allowed on fall, 1940 orders.

We are located in the **Great Fruit Belt** in Berrien County, Michigan, 1 1/2 miles from Lake Michigan, and 3 miles from the Indiana state line. M.C.R.R. and P.M.R.R. service.

GUARANTEE

WE GUARANTEE that our nursery stock is first-class in every respect, free from disease, freshly dug, true to name, and to reach you in good growing condition. We will at our option either replace free of charge or refund your money on any shipment which arrives in bad condition, providing claim is made within five days after arrival of shipment, with a signed statement from your Express Agent or Postmaster, showing the extent of damage.

Our stock is carefully handled and full of vitality and, under ordinary conditions, should grow for you. But if it does not, owing to the weather and other conditions over which we have no control, we will replace it at half price the following season, if you notify us not later than October 1, 1940.

It is understood between purchaser and ourselves that we are not liable for any greater amount than paid for stock.

GEORGE STROMER

A Barrel of Strawberries

And a Barrel of Fun

Grow any everbearing Strawberry in a barrel. Fifty plants can be planted in a common sugar barrel, or even on old potato barrel. Bore 2-inch holes in the side of the barrel, and fill barrel with some good soil. Then set the plants in these holes, and 10 plants can be set on top. Keep well watered. Be sure to bore a few small holes in the bottom for drainage. Barrel can be kept in the back yard, or even on the back porch. This saves space, and you can have berries for breakfast twice a week. No weeds, no cultivation necessary. Keep runners pinched off. Wayzata would be the ideal variety to grow by this method. They make very few runners.

Attention!

Commercial Growers and Large Lot Buyers

Despite the dry fall growing season in many berry plant sections we have been especially favored in our locality with ideal climatic conditions plus large acreages of sub-irrigated soil, and have to offer a large stock of Mastodon and Gem Everbearing Strawberry plants. To anyone interested in these two outstanding varieties in large quantities we have an especially attractive offer to make on quantities of 5000 or more plants.

Before purchasing your plants be sure to send for our special low prices on quantity orders. Phone or wire if you are in a hurry.

Phone: New Buffalo 27

Surplus Everbearing Strawberry Plants

During our digging season, often there are a few plants left over after each day's packing, and rather than hold these, will offer them to you for **\$4.50 per 1000**. These will be No. 1 in every way, but will not be labeled. They will be either **Wayzata**, **Mastodon**, or **Gem**, as they are the only everbearing varieties that we have. On page 7 we offer non-everbearing varieties in a surplus at \$2.99 per 1000. The supply of both will be limited, so order them early. **NO DISCOUNT.**

MASTODON

GIANT MASTODON EVERBEARER

3 Full Crops In 18 Months

3 Big Profits

When we tell you that **Mastodon** does produce three full crops in 18 months; it is the largest berry grown; bears in 60 days after planting; is an excellent shipper; brings more per quart; and is a delicious home use berry—you probably won't believe it unless you have grown them yourself—and we don't blame you, but read what other folks have to say.

Mastodon does not require special soil, care or petting. Sell for 30c to 50c per quart. Mastodon sells like "hot cakes" on roadside stands. Commences to bear in 60 days after you set them. We picked 181 quarts of berries from 1 1/2 acres on November 1st, and on November 2nd the ground was frozen solid. This frost is what stopped the Mastodon. Light frost will not injure them at all.

A REAL WONDER

It is the largest everbearing berry grown. **Mastodon** is the most prolific, the finest, the most beautiful berry with the real Strawberry flavor. It is a berry that bears early and late; one that can be picked all spring and summer. Many of the berries grow as large as a silver dollar, and are just as perfect. **Mastodon** is the real marvel in Strawberries; nothing like it has ever been known. Plants that were set in May this year have produced as high as 3 quarts per plant. A field of this **Mastodon** in bearing is a sight never to be forgotten. **Prices above.**

FREE

500 Mostodon Everbearing Strawberry Plants absolutely free with every order of \$50 or more, or 1000 Dunlap or Aroma.

250 PLANTS

Enough to supply a family of five with luscious berries all summer and fall first year set.

STROMER'S Improved Stroin Mastodon

FOR ONLY \$2.25 LESS DISCOUNT

Collins, N. Y.,

Oct. 14, 1938.

Mr. George Stromer.

Dear Sir: Again I am writing you in regard to the 2,000 Everbearing Strawberry Plants I bought of you last spring. On October 6th and 7th, 1938, the thermometer dropped to 20 degrees. The ground was frozen hard, and the water had ice three-fourths of an inch thick on it. The neighbors said that killed the Strawberries but not one berry was hurt. I picked them and sold them to Cecil Pendleton's, of Collins, N. Y., for 30c per quart. And Belle Pendleton and Francis Beckrich, both of Collins N. Y., counted 63 berries on one plant. They believe the plants would bear berries at the North Pole. I sold 12 quarts of Strawberries on September 30th at 30c per quart. The color and size were grand.

Very truly yours,
ERWIN J. BECKERICH.

Collins, N. Y.,

Sept. 6, 1938.

Mr. Geo. Stromer.

Dear Sir: Last spring I purchased 2,000 Mastodon Everbearing Strawberry Plants of you. I set them out May 13th, and had the first strawberry shortcake July 20th. Berries were ripe 60 days after planting. People were amazed to see such wonderful plants. They beat the pictures in the catalog three to one. They look like year-old plants. I counted 46 berries on one plant and 45 on another plant of all sizes. I am selling Strawberries for 30c per quart.

Yours very truly,
ERWIN J. BECKERICH.

GEM

GIANT EVERBEARER

Bears 60 Days After Planting

Three full crops in 18 months. GEM is a direct offspring of the old Progressive Everbearing Strawberry. Mr. Frank Keplinger, of Central Michigan, found a single plant growing in his Progressive field, and he guarded it till he had plants enough of it to offer to nurserymen. It is one of the greatest ever-bearing Strawberries ever introduced because it is so sweet and firm. Berries are smooth and large, and we find them to be fully as productive as the Mastodon. Berries ripen evenly and are light red all the way through. The young runner plants will bear as well as the mother plant, so this makes it very productive.

Grow GEMS in hill system for best results. Keep all runners nipped off.

Fujiyama

FUJIYAMA THE LARGEST BERRY EVER GROWN

This Japanese variety is really well named, being named after Japan's famous largest mountain, Mt. Fujiyama. Fujiyama is the largest of all Strawberries. Berries have been known to measure 7 inches around and weight nearly 2 ounces. Fujiyama is a home use and nearby market berry, being not quite firm enough to ship far. Makes a beautiful plant and picking row, and produces like Premier. Ripens mid-season to late, and holds its size well to the end.

GRAND CHAMPION →

(ALL SEASONS)

Greatest money-making Strawberry ever introduced, no crop failure on account of frosts. Has produced over 5000 quarts on one-half acre in spite of heavy spring freezes.

ALL SEASONS BEARER. Commences to ripen with the Premier, the earliest berry, and produces fancy berries with the Aroma, which is a late berry. Plants are large, extra heavy, healthy foliage; berries are bright red, very large in size, and have a fancy appearance. By all means try a few in your locality. Supply is very limited. Order early to avoid disappointment.

Catskill

New!

Has Been Known to
Outyield Even Dorsett
and Fairfax

Catskill

In all sections except the far South growers can plant Catskill with confidence of good results. As a sure cropper it ranks with Premier, and is just about as productive. Berries will average larger than Premier. Catskill is about six years old, and in all this time we have not known them to fail a crop. The berries are large, firm, bright red, and make a fine looking package when picked. They are plenty firm enough to stand shipping, and the quality is up with most of them. Being that Catskill is such a heavy bearer it is used in a good many places for combination midseason and late. Berries are borne on long upright fruit stems, which makes it the easiest picking berry of them all. It is past the experimental stage, so we advise all our customers to go to it, as you cannot make a mistake in setting Catskill.

Famous DORSETT

6640 Quarts to the Acre

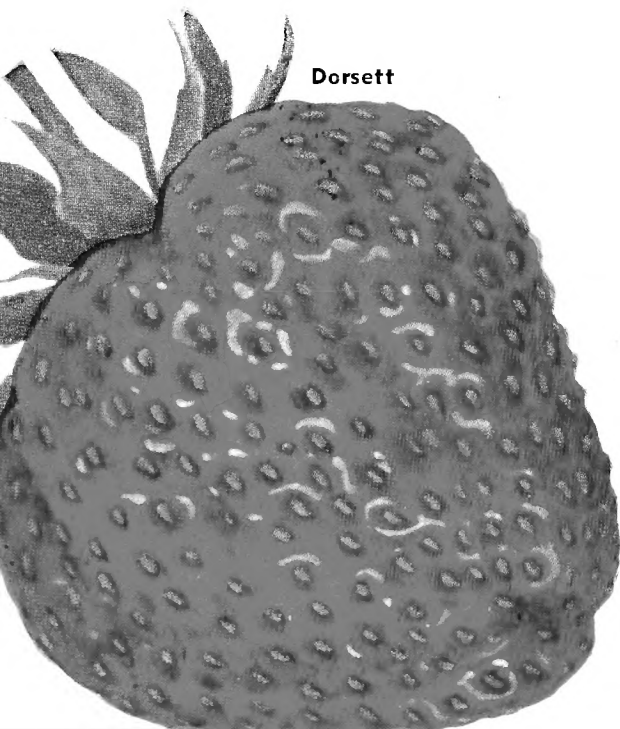

This new variety was originated by the United States Department of Agriculture. It is a cross between the PREMIER and the Royal Sovereign, an English variety.

Dorsett is one of the finest berries known, and one of the heaviest producers, having produced at the rate of 6640 quarts per acre in the East. The foliage is a very dark green and holds this fine color way through the fruiting season. Dorsett berries average very large in size, even a little larger than Premier. Color is of light red, and will hold this light red color long after picking. This probably will be a big factor when you market them on the wholesale markets, as that is what the wholesale fruit buyers are looking for in the past few years. Light red berries always appear to be in better shape than do dark red ones. Be sure to try a few of the plants this year. Dorsett is now the leading berry for all purposes.

LESS DISCOUNTS

Dorsett

Displays Large Berries

A quart of huge Dorsett Strawberries grown by Harry Wakeman of Bangor is exhibited by Sid Smith of Breeds-ville, State Fruit Inspector, on the Twin City market.

The berries average between 1 1/2 and 1 7/8 inches in diameter and are a solid red fruit said to have as rich qualities as the Dunlap. A truckload of the berries shipped from Anna, Ill., to Duluth, Minn., a distance of over 800 miles, held their color, shape and taste exceptionally well, according to Mr. Smith.

FAIRFAX

It is considered by most everyone who has tasted them to be by far a better flavored berry than Premier, and other good flavored berries. FAIRFAX, like DORSETT, was introduced by the United States Department of Agriculture, and is supposed to be a cross between the Premier and the Royal Sovereign. The foliage, like that of Dorsett, is of a very good quality. Good foliage means a good fruiting berry.

Fairfax is also a very productive berry, having produced at the rate of 5120 quarts per acre. The size of the berries averages large. They will average with the Ambrosia, and that is going some. Fairfax is a little more firm than Dorsett, and is fully as firm as Catskill. This makes it a wonderful shipping berry. The color of the Fairfax is dark red, with yellow seeds, and a nice green hull, making a beautiful combination. You should by all means try some Fairfax this spring.

Ambrosia

SOMETIMES CALLED "FROST KING"

The Perfect Late Variety

The Ambrosia Late is absolutely the very best late Strawberry that we have today. It is also one of the very largest Strawberries that we have ever grown. Thirty berries are known to fill a quart box. Plants grow tall and vigorous. Have seen them growing on good land, where the leaves and fruit stems would be 14 inches tall. As the berries ripen and get heavy, the fruit stems will turn down, and what a sight to look at, when you brush the leaves to one side. At last we have found a real good late Strawberry to lengthen the Strawberry bearing season.

Premier

Stromer's PREMIER

The Most Popular Berry Ever Introduced

If you plant STROMER'S PREMIER you will get the first berries on the market. They will be bearing heavily before other varieties begin. Your biggest picking will be when berries are in good demand and are bringing top prices. Premier will grow anywhere. The plants are sturdy and long rooted, a good drought-resister. The berries are very large, and hold their size to the last picking. The flavor cannot be beaten.

In Premier we offer you the greatest early Strawberry of all time. However, the early ripening of this variety is only one of its many good features. It is immensely productive, and unlike other early ripening Strawberries, the fruit produced by Premier is of the very finest quality, color, texture and flavor; and last but not least, every berry is large in size and uniform in shape. For every purpose that a Strawberry is wanted, Premier is supreme—eating, canning, preserving, distant and local market—no other variety can give you any more pleasure, satisfaction or profit. Premier succeeds everywhere and never fails to give a big crop of the very finest berries. The foliage is tough and healthy and grows tall and rank, covering the blossoms and berries, and protecting them from frost and scalding sun.

KY. AROMA

(VERY LATE)

This late Strawberry has long been a favorite market variety in Kentucky, Tennessee, Missouri and Arkansas, but is grown with equal success in every other part of the country. Usually commanding premium prices on all markets, it is one of the greatest of long distance shippers, owing to the supreme quality of the berries. It is also highly desirable and suitable for home use as there is something indescribably rich and pleasant about the flavor that commands the admiration of all.

SENATOR DUNLAP

(MIDSEASON)

SENATOR DUNLAP IS AN OLD STANDARD VARIETY. It has made more crates and more dollars for berry growers than any other one variety. Requires very little attention. It's the toughest variety known. Plants are healthy, fast growers, and make plants freely. Should be set 24 inches by 36 inches apart in rows. Berries very dark red. Wonderful canning berry; great for preserves. Senator Dunlap is sometimes sold under the name of Dr. Burrill.

Surplus Strawberry Plants

\$2.99 No Discount

During our digging season every spring, when we are getting out 50,000 to 90,000 plants every day, naturally, at the end of each day, there are a few plants of all varieties left. We never carry plants over from one day to another, so that these plants are classed as surplus plants. We offer them to you who do not care to have named varieties, at \$2.99 per 1000. We will not label these plants as to variety, simply calling them surplus plants. They are first class plants, fresh dug, and will bear you a fine crop. The plant crop is short and we reserve the right to withdraw this offer at any time, so order this bargain early.

NO DISCOUNTS

Boysenberry

THE NEW MONEY-MAKER

Known to bear nearly 6 tons per acre. Berries get to be 1½ to 2 inches long, 1 inch thick. Sweet, few seeds, and hardy.

Boysenberry is the sensational new berry. It was introduced in 1932 in California. It is a cross between the California Loganberry, Raspberry, and Blackberry. Think of a berry that has a little of each of these fruits all in one giant, nearly seedless, beautiful wine-colored berry, with a flavor that you will never forget. They are sweet and juicy, yet firm enough to stand handling and shipping to market. The vines are hardy, and can be grown in the East and North, as well as in California and other southern states.

Enormous Size

From a recent publication by the United States Dept. of Agriculture is the following statement: "Under favorable conditions, 50 of the largest berries will fill a quart box." Of course these 50 berries would have to be selected, and would not be the average. We would say that 75 to 85 berries would be average.

Profitable

Whether you are growing berries for market or just a few in your garden, it will pay you well to get started right now. Twenty-five plants will be plenty for home use. Six hundred plants will set an acre, set 8 ft. by 8 ft.

LUCRETIA

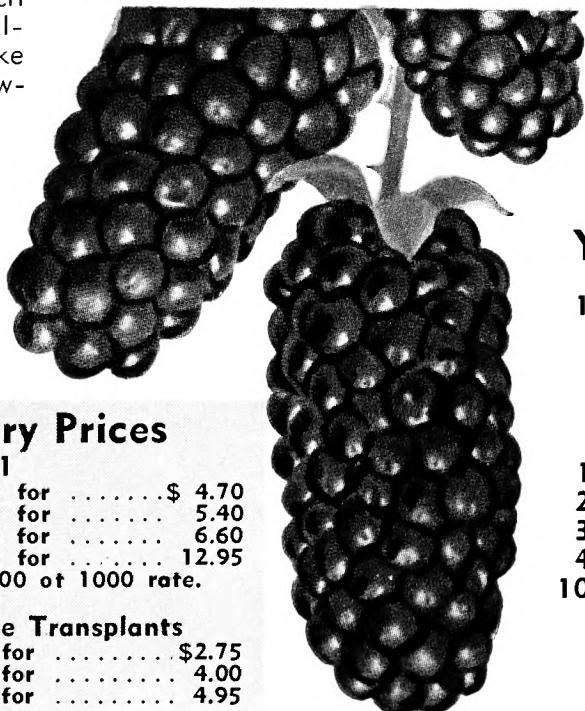

The Big Hardy Dewberry

The only real good Dewberry on the market which is good for all purposes, being very productive, of extra large size, earlier than any of the rest, will grow and thrive on very light soil and live for many years. If you live in a locality where your thermometer registers seven degrees below zero, you can easily prevent the vines from winter-killing by laying down on the ground and covering them with straw, which can be held in place by just a few shovels of earth. Then in the spring they can be taken up and tied to wires which are fastened just like a grape trellis, but not as high, something like 3 feet high is about right. Dewberries make a good addition to your blackberry list, you will like them as well or better for all uses than the common run of blackberries, and ripening early, you get the advantage of higher prices; as the berry is much larger, you can pick a crate quicker. They grow practically free from all diseases.

Boysenberry

New YOUNGBERRY

This new berry is so much different from any berry that is grown in most parts of the country. It is a cross between the Loganberry and Dewberry. Color of fruit is a rich wine color. Size 1 to 1½ inches. Flavor is pleasant, sweet, with the tartness of the blackberry. Excellent for table use, canning, jellies, pies, and for wine. The plant is a rank grower. Withstands cold and heat, adapted to a wide range of soils, a great producer. Try them in your locality. They will be the talk of your neighborhood.

CUMBERLAND

The Business Black Cap

This is without question one of the most profitable and popular Black Raspberries ever grown. It is the one safe and reliable commercial variety because you can depend on a big crop regularly. We call it the "Business Blackcap" because it succeeds on all soils and produces its big crop year after year.

We have never known Cumberland to fail, and the best proof that it is a profitable variety is the fact that the demand for plants is greater every year and more Cumberlands are planted than all other varieties combined.

Cumberland is perfectly hardy and tremendously productive. The berries are extra large, glossy black, and not equaled by any other variety in quality, flavor or appearance, except Logan. Whether wanted for market or home use, we can recommend Cumberland to our most exacting customers. Disease-free. Twice state inspected plants.

LOGAN *Black Raspberry*

Most Dependable Early Black Raspberry. This variety, through sheer merit, has replaced very nearly all of the standard kinds. The berry ripens one week earlier than Cumberland, giving the grower a chance to make some real money before Cumberland comes into bearing. It is an extra heavy yielder, with berries as large or larger than Cumberland.

QUILLEN *Black Raspberry*

The Latest Blackcap. Comes into bearing after all other varieties are practically through. Fruit very large and of fully as good quality and texture as Cumberland. Practically immune to mosaic, anthracnose and other serious diseases. This variety shows great merit in all sections of the country, and we urge you to give it a trial.

We have a limited supply of Potomac Purple Raspberry plants in 1-yr. and 2-yr. transplants at the same prices as Sodas on page 11.

Golden Queen

GOLDEN QUEEN

A beautiful, large, golden yellow Raspberry. Many prefer this variety to any of the red or black sorts, owing to its sugary sweetness and unsurpassed flavor. Should be in every garden, its beauty and high quality placing it at the head for table use. The canes are hardy, of strongest growth and very productive.

NEWBURGH Red Raspberry

Introduced by the New York Experiment Station. The plants are heavy and stocky, the canes do not grow quite as tall as some of the other varieties, but carry a large load of berries. In New York state they have yielded 30% more fruit than other varieties; so far Newburgh has proven immune from mosaic, is very hardy and easy to grow.

The berries are larger than other varieties, their size holds up well during their long picking season. The firmness and freedom from crumbling make Newburgh a good long distance shipper and market variety. The color of the berries is a lighter red than that of Latham, flavor and quality is easily on a par with Latham.

MARCY New Red Raspberry

Marcy was the largest of all red Raspberries grown at the New York Experiment Station, and the size holds up well throughout a long season. The shape is long, conic, and flesh moderately firm and thick, with only a small cavity, making the variety a good shipper. Color is medium red. Flavor mild. Plants are tall, sturdy, vigorous, and hardy, with stalky canes that hold the fruit well off the ground. Actual tests show that Marcy is the biggest of all the leading varieties.

TAYLOR Raspberry

← The berries are very large, much larger than Latham, hold up well through a long season. It has a long conic shape and is of a bright red color with a complete lack of crumbling, which adds materially to the appearance and attractiveness. The firm, thick flesh and the very small cavity make it the ideal shipping berry. Flavor is sub-acid, of the highest quality, which is equal to Latham. Ripens the same season as Latham and bears an enormous crop. They do not cling too tightly to the bushes.

The Taylor fills a long-felt desire for a perfect Red Raspberry.

We unhesitatingly recommend Latham as one of the best Red Raspberries ever grown. This variety originated at the Minnesota State Fruit Breeding Farm and is being grown extensively in Minnesota, the Dakotas, and Canada, and has never been known to winter-kill even though exposed to 45 degrees below zero. Latham is a tall, vigorous grower, canes extra heavy, foliage dark green, entirely free from disease. Ripens with Newburgh and is enormously productive. Berries much larger than any other Red Raspberry, many of them one inch in diameter. Color good, quality of the best, full Raspberry flavor. Excellent for shipping or home use.

CHIEF Red Raspberry

A very popular early variety. Offspring of the famous Latham. Has proven hardy, disease resistant, a heavy cropper, of excellent quality and a good shipper. Berries large, rich bright red. Ripens ten days earlier than Latham, bridging the gap between Strawberries and ordinary Raspberries.

ST. REGIS Everbearing Red Raspberry

One of the most valuable of all red Everbearing Raspberries. The habit of growth is of a bushy nature; will produce berries the first year in the fall, and a full crop the following spring and again in the fall.

St. Regis resembles Chief; its fruit is similar to that variety in quality, flavor and appearance. In September, long after Raspberries are out of season, St. Regis will bear a full crop of fruit, which commonly sells for seven or eight dollars for a 24-pint crate. If you have a market at hand where you can dispose of the fruit, you will find St. Regis a very profitable investment when grown on a commercial scale. If you have not the time or the ground to grow St. Regis for market, be sure to plant at least a few bushes in the garden and keep your table supplied with all you can use.

INDIAN SUMMER Everbearing Red Raspberry

This new Everbearing Red Raspberry will bear two crops a year. One crop in the summer the same as any other variety, and another crop in the fall on the new wood. Commences to bear in September and will continue till frost. The berries are very large, conical shape, and of a beautiful bright red color. Sell for 35 cents a pint in the fall and there is some real money to be made for the one who plants these Indian Summer plants this spring. Plants are vigorous, hardy, and disease free. Think of having some delicious red Raspberries to eat and sell from September till winter.

ALFRED Blackberry

STANDS 35° BELOW ZERO

GEORGE STROMER—Originator

Year after year, with diligent care, I have propagated these plants to such an extent that the fruit is now being supplied to the local markets at a fancy price, and is always in good demand. Last year I measured a good many berries that were over one and one-half inches long, and three inches around. Nurserymen claim that the ALFRED is the largest berry they have ever seen. Buy from the originator and get GENUINE ALFRED.

Lack of space forbids describing in detail the many good points of this variety; however, I wish to call your attention to the outstanding reasons why the ALFRED is superior to all other varieties.

BEARS SECOND SEASON. ALFRED is such a healthy, vigorous grower that it produces a good crop of berries the year following planting. It is not unusual to pick 10 to 40 berries from the bush the same year planted.

IMMENSE SIZE. The berries are twice as large as ordinary Blackberries, many of them 1½ inches long, and the finest flavored of all Blackberries. It is an ideal table berry because it is practically CORELESS, sweet and delicious. It is very small seeded.

EXTREMELY HARDY. ALFRED can be grown anywhere without winter protection, having withstood 30 degrees below zero, and not a single tip of a branch injured, while other varieties were frozen to the ground.

EARLY SEASON. This is one big feature of this variety. It ripens a week to ten days earlier than Eldorado and in productiveness it is in a class by itself. We have seen them bear a second crop. We picked many cases this year in September.

SODUS Purple Raspberry

The Sodus is the most promising early Purple Raspberry. The berries are very large and firm, with good quality, and do not crumble as Columbian do. Plants are very vigorous and bear an unusually large crop, much more so than one can imagine, and up to the present time we have noted no winter injury whatsoever. Unlike our older purple varieties of Raspberries, we find them practically 100% free from diseases, and where Purple Raspberries are grown for commercial or home use, this variety should replace the present varieties.

Northern Spy
(Farley No. 9)

NEW ANOKA

Ripens in September. The size, color and flavor of the New Anoka make it a favorite. Also a good keeper. The remarkable feature of this excellent Apple is that it comes into bearing very young, is also dwarf in stature, so that it is well adapted to back-yard planting or closer in the orchard. A very good cooking Apple.

NEW CORTLAND

The young bearing habit of this fine new Apple has astonished growers everywhere. It has proven to be one of the greatest eating, shipping, and market Apples ever introduced. The trees are large, healthy, and immensely productive. Fruit large and handsome. Flesh fine grained, crisp, and juicy.

DOUBLE RED DELICIOUS

This variety is like Delicious in every respect excepting that it has added color. As the name implies this is a solid red, highly colored Delicious. It is recommended especially for locations where Delicious does not have sufficient color. The tree is hardy, healthy, vigorous and bears regular annual crops. Flesh is fine grained, crisp, melting and juicy. Quality is very good and the season is November to March. Delicious is a wonderful eating Apple.

Grimes Golden

McIntosh

Stromer's Profitable APPLE TREES

NEW HARALSON (For Cold Country)

This new variety stands in a class by itself on account of its hardness. It is the coming Apple for the cold Northwest. Comes into bearing very early in life, and is a vigorous grower. Fruit is good size, red and long keeping. Very good eating Apple. If you are looking for an Apple that will bear where it gets 40 degrees below zero, order Haralson.

JONATHAN

The color of the fruit is bright red, the flesh is white, firm, crisp, tender and juicy. It is a very beautiful Apple, and one of the very best eating Apples. Not such a good cooker. It is one of the most desirable varieties for the holiday season. Good keeper. Trees are hardy and bear very young.

McINTOSH

Medium in size. Fruit is beautiful red, somewhat striped. Flesh is white, crisp, and highly flavored. The tree is hardy and vigorous, and starts to bear young, and heavily. It is a favorite market and eating Apple. Ripens in September and October. Not a keeper.

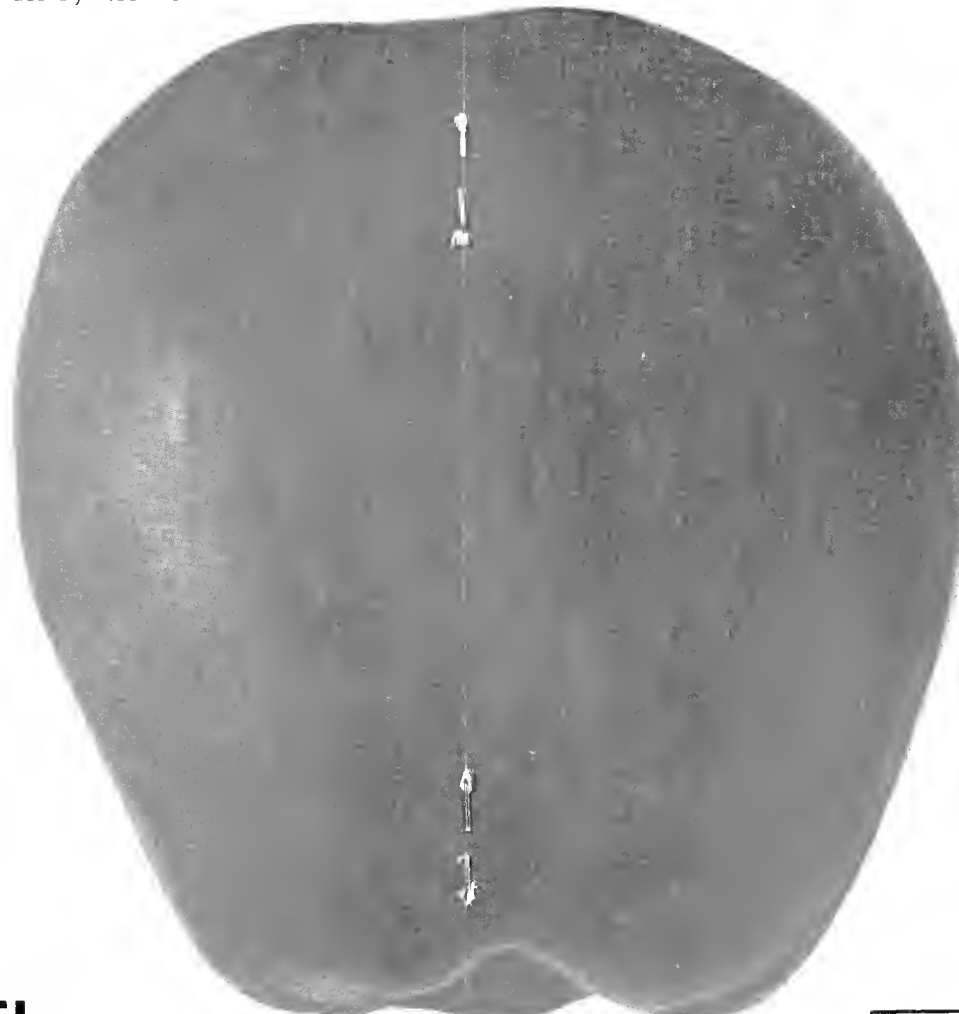

LOST LABEL

Each year we have a few fruit trees from which the labels become broken off and lost so that we have no way in knowing what varieties they are, so we are going to offer them to you at real money-saving prices. These trees are from varieties that we have listed in this catalog, which are the cream of all varieties, so you will be sure of getting good stock. All trees will be 2-yr., 9/16, 11/16, and some of the 3-yr. sizes. Supply is limited so order early. Here are the prices:

NORTHERN SPY (Farley No. 9)

A strong, vigorous tree, early bearing, heavy annual production, large size in fruit and an attractive typical striped color type. This parent tree produced a full crop of nearly 12 bushels when only 9 years old and a total of 141 bushels by the end of the sixteenth season. The fact that this tree produced 12 bushels when only 9 years old, shows that it must have come into bearing at not more than 6 years after planting. The fruit is large and extremely attractive. Color, bright red with indistinct stripings. Flesh, very juicy, crisp and tender and most excellent for either dessert or culinary uses. Season, November to March.

ROME BEAUTY

Beautiful dark red Apple of large size and handsome shape. Retains its rich color and juiciness in storage until spring. Popular for dessert purposes, cooking and drying. One of the best.

SNOW (Fameuse)

Well known early winter Apple. Snow-white flesh, from which it takes its name. Medium size. Deep crimson in color. Juicy and very pleasant to eat out of hand. Fills in the gap between early fall Apples and late winter Apples. Tree very hardy and productive. November to December.

STAYMAN'S WINESAP

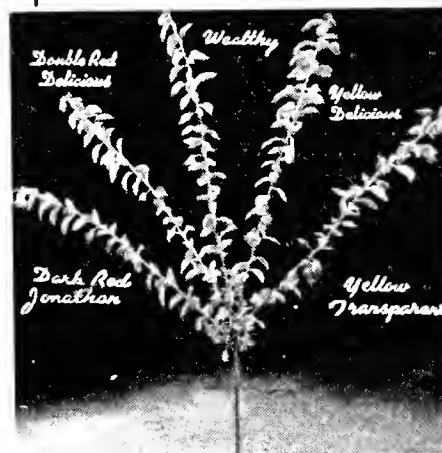

Succeeds everywhere. Fruit is dark red, tinged yellow, of rich, enticing flavor. A fine eating Apple and sells readily on the market.

TURLEY

(Turley Winesap)

The Turley is gradually winning its way solely on its merits. The variety originated in Indiana and is much esteemed by the growers of that state as a commercial Apple. The tree is vigorous and bears fruit early, in 5 or 6 years from date of planting. The fruit is very red and inclined to be large. Season just before Stayman's Winesap.

"VEST POCKET APPLE TREES"

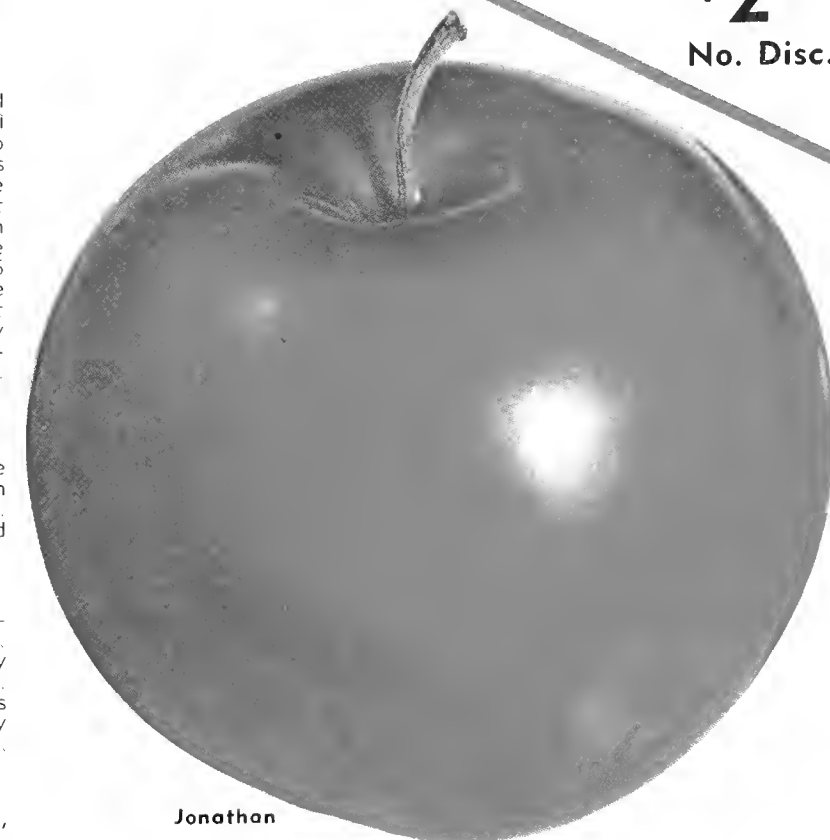

Here is just the thing for you folks who have just a limited amount of space to plant trees. Here are 5 fine varieties all on one tree. Dark red Jonathan, Yellow Delicious, Red Delicious, Wealthy, and Yellow Transparent. Apples from early summer to late fall. Be the first in your community to have this real worth-while novelty. We offer these trees in 11/16 inch grade, 5 to 6 ft. Each \$1.50; 3 or more at \$1.40 each. Less discounts.

COLLECTION

5 Jonathan. 2-yr., 9/16.

Jonathan

WEALTHY

Fruit is large size, round, smooth, and dark red. The flesh is white, tender, and juicy. This is the finest variety of its season. It ripens in September and will keep well into the late fall. A very good commercial variety.

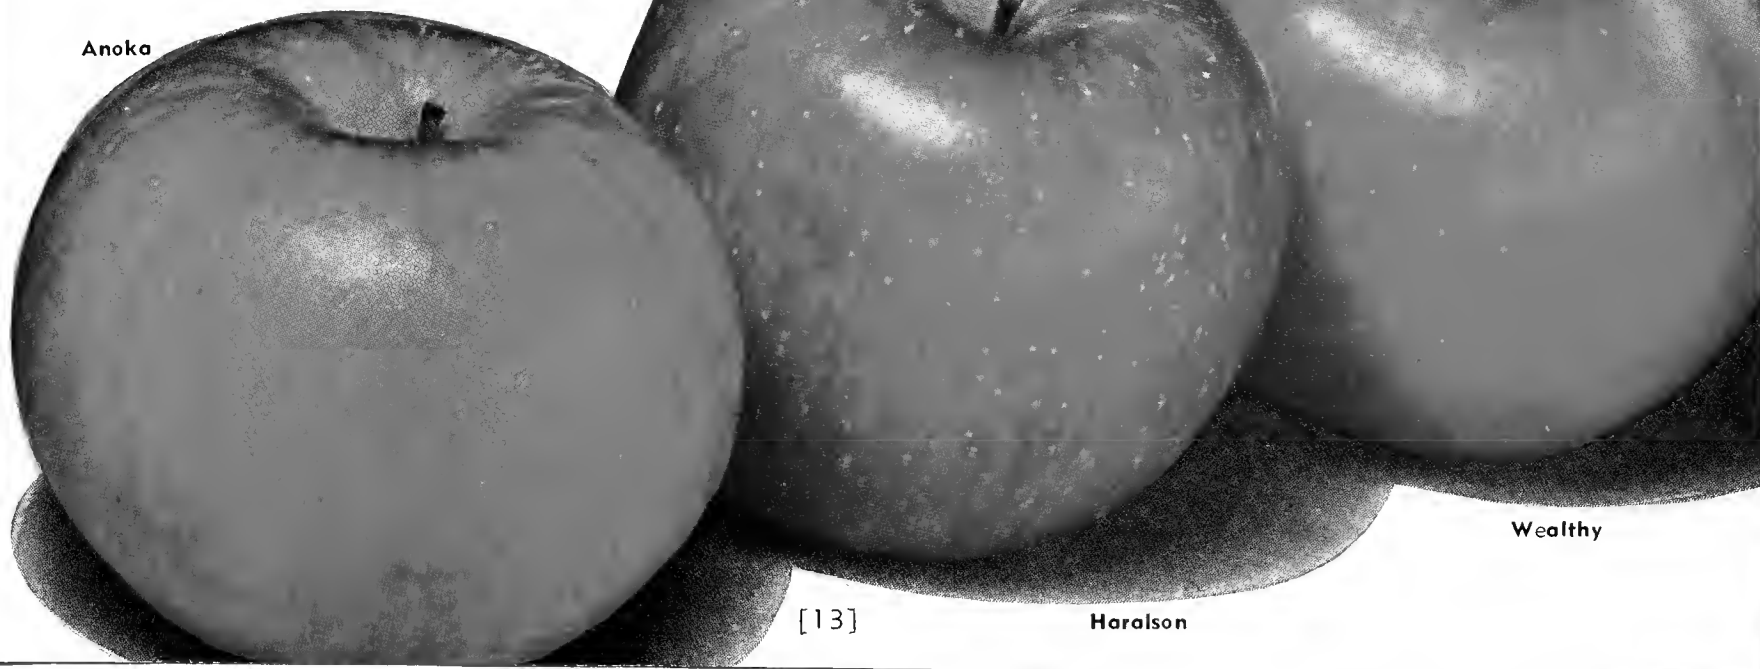

YELLOW TRANSPARENT

The very finest extra early Apple. It ripens late in July and continues in season until September. Fruit of good size, waxy yellow color. Flesh white, mild, juicy, and sweet.

Dolgo Crab Apple

The perfect Crab. Hardy everywhere. Heavy bearer, usually beginning the year after setting. Jells perfectly even when dead ripe. A fine ornamental tree for the lawn as well as a wonderful commercial sort. Rapidly displacing such varieties as Transcendent and Hyslop. Bears young.

Hale-Haven

PEACH

This marvelous new Peach was introduced through the efforts of the Michigan State Experiment Station, South Haven, Michigan (Mr. Stanley Johnson, Supt.). It is a cross between the famous varieties South Haven and J. H. Hale. A large, beautifully colored, yellow-fleshed Peach, ripening approximately 2 weeks before Elberta. A perfect freestone, strong, thrifty grower, splendid shipper and an extremely hardy, heavy bearer of exceptionally fine flavor. The Hale-Haven has extremely high color and colors highly on the trees several days before it is ripe, thereby permitting picking while rather green, for distant shipments. Test trees produced full crops this year at the Experiment Station when crops of many other standard varieties were a failure due to low temperatures last winter. This variety will make you big money and should be included in every planting.

ELBERTA

The fruit is very large, orange-yellow color, overspread with red. Flesh is yellow with red near the pit. Freestone. Juicy, firm, yet tender and fine for canning. Sweet and mild. Ripens about September 10th to 20th, depending of course on the season.

ROCHESTER

A yellow freestone Peach having the exceptional merit of being early, ripening about August 10th; extraordinarily sweet and early bearing. In other respects it compares favorably with the best standard varieties. Fruit is large, yellow in color, prettily blushed. Flesh sweet, juicy and of delicious flavor. It keeps and ships well. Tree a vigorous grower, hardy and an annual and prolific bearer. Season three weeks before Elberta.

MAYFLOWER

The earliest ripening Peach. Medium in size, dark red in color with a juicy, tender, white flesh. Delicious flavor. Tree productive. Ripens last week in June or first week in July.

CHAMPION

A white-fleshed Peach, very excellent in quality; attractive fruit; large. Creamy yellow, tender flesh, very pleasant flavor, having a peculiar honey taste. Stone semi-free to free. Ripens with St. John; three weeks before Elberta.

POLLY PEACH

This is the hardiest of all white Peaches. Originated at the Iowa Experiment Station, withstands 20 degrees below zero. You folks who live out of Peach country should try Polly, and we are sure that you will have Peaches every year. Polly is a home use variety, as it will not stand long shipping. The fruit is large, white flesh, freestone, ripens a few days before Elberta.

FERTILE HALE

This new introduction was brought about by the Greening Nursery Co. It has been produced by bud selection and has been found to need no other variety to help pollenize it like J. H. Hale does. These Fertile Hale will produce full crops of beautiful Hales even more beautiful than the J. H. Hale. The Fertile Hale is far more hardy and productive in bud than the common J. H. Hale. At the experiment station in South Haven, Michigan, Fertile Hale came through with a crop when J. H. Hale and Elberta failed. Flesh yellow, with yellow skin with deep carmine blush. Good shipper. Freestone. Will bring the highest price on any market. Fertile Hale, like South Haven, are real money makers on account of their hardiness and fine quality. They are the two commercial Peaches to grow for profit and pleasure. Fertile Hale has a plant patent applied for. Our trees are the genuine.

2-yr., 9/16 Inch.

Each	\$ 0.55	50 for	\$17.00
10 for	4.00	100 for	30.00

GOLD DROP

Beautiful golden yellow. Freestone. Sweetest of them all. Not very juicy. When canned the juice will be thick, requires less sugar. Not very much of a market Peach. You will sell all you can raise right around home. Everyone knows what Gold Drop is for canning.

3-yr.-old, 4 to 8 ft.

Each	\$1.00
------	--------

SOUTH HAVEN

This variety is the hardiest of all commercial Peaches. It is not only a very good commercial Peach, but extra fine for canning and table use. Our South Haven are from selected buds and are of a high yielding strain. The fruit is large, round, very uniform in size. Flesh is yellow. Color of skin is deep yellow with red cheek. Freestone. Ripens about 18 days before Elberta, and at just the right time to bring big market prices. It is absolutely the best canning Peach. South Haven makes a good variety to plant with others to help pollenize.

HARDEE U. S. PLANT PATENT NO. 120.

HARDEE HAS BUMPER CROP AFTER 1934'S LONG 18° BELOW ZERO
Scientists Hail HARDEE as the Most Important Peach Discovery In Past 25 Years

The fruit is described by the Ohio state authorities as being "large to above large. The fruit is slightly elongated and characteristically pointed. It is an Elberta type, ripening with Elberta and a little later. It is yellow, freestone, highly colored and with firm flesh of the best quality." Its thick skin makes it an excellent shipper. The flavor of the fruit is distinct and delicious. It has a very real Peach flavor. The tree habit and vigor of growing is good indeed and may be classed as intermediate between Elberta and J. H. Hale. This Peach is sold under license of the patent holder.

VEST POCKET PEACH TREES

Here are five fine Peach varieties all on 1 tree, Elberta, Golden Jubilee, Red Bird, J. H. Hale and Belle of Georgia. It takes little space and will furnish you with Peaches from middle of August until the first of October. Order now. We offer these in 11/16 inch grade, 5 to 6 ft., at \$1.50 each; three or more, \$1.40 each. Less discounts.

Stromer's Cherries

BLACK TARTARIAN (Sweet Cherry)

Fruit very large, bright purplish black, juicy, very rich and of excellent flavor. The tree grows vigorously, and is very productive. Fruit ripens last of June to early July.

Black
Tartarian

YELLOW GLASS (Sweet Cherry)

Fruit very large and heart-shaped. Color is a pale yellow with a light red cheek when exposed on the sunny side. Flesh is firm, rather brittle and of fine flavor. Pit small. Ripens in July. Trees vigorous and hardy. The best yellow.

EARLY RICHMOND (Pie Cherry)

This is the earliest of all pie cherries. Fruit is medium large, bright red and juicy. Ripens early in June. Fine for canning and pies. Starts to bear very young, and is very hardy. The kids will thank you if you plant a tree or two of this variety. Nothing will be more popular with them than a tree full of Early Richmond in early June. Ripen with strawberries.

MONTMORENCY (Pie Cherry)

This is one of the best of all pie Cherries. It ripens about 10 days later than Early Richmond. Fruit extra large, bright shiny red, firm flesh, juicy, and a fine home use and market variety. Trees grow strong and are perfectly hardy. They bear in 2 or 3 years, and continue to do so for many years.

SWEET SEPTEMBER (New Fall Bearing Cherry)

Ripens September 1st and Hangs Until the Snow Flies

The young trees start to yield some fruit the second or third year after planting and produce heavy annual crops thereafter. There is no previous record in the history of Horticulture of a fall-bearing Cherry, until the accidental discovery by an amateur horticulturist in northeastern Ohio of this sweet Cherry tree, which for some unknown reason ripened its fruits in September instead of June. The tree blossoms at the same time as other standard varieties and is apparently hardier in the bud than the average sweet Cherry. The fruits are an attractive medium dark red similar to Windsor, the standard variety which it most nearly resembles, and the quality is excellent for eating fresh and for canning.

It is a remarkable fact that the original tree, which now stands about 30 feet high and approximately the same measurement across, has produced a crop year after year, even as high as 15 bushels as it did in 1932, with practically all fruits sound and perfect in every way—no worms, rot or leaf spot—without ever having been sprayed.

Here is a fruit that every home owner should have in his dooryard to extend the season for sweet Cherries through the late summer and autumn.

Superb Apricot

Saxolin Duplex Crinkled Waterproof Tree Wrap

Method of Application

By applying the Spiral Bandage from the topmost part of the trunk downward, it enables moisture from rains to enter the wrapped area. The moisture is retained by the Duplex Waterproof Kraft—a distinct advantage to the growing tree.

SUPERB APRICOT

A hardy tree and a sure cropper. The best flavored, most productive hardy Russian Apricot yet produced. Medium size, light salmon color. 2-year-old, 9-16 inch and up, each 70c; 3 for \$2.00; 6 for \$3.75; 10 for \$5.50. 3-yr., each \$1.00; 2 for \$1.80.

PROTECT YOUR YOUNG FRUIT AND SHADE TREES From Sun-Scald, Mice, Rabbits, Borers and Many Injurious Insects

Girdling the trunks of transplanted and newly planted fruit and shade trees has been practiced by U. S. Agricultural Colleges—Soil Conservation Service—State and County Highway Commissions—State College Extension Service—Landscape Architects—Pork Executives, and Foresters for a number of years.

The use of Crinkled Duplex Waterproof Kraft is advocated as a thoroughly tried and proved procedure of wrapping tree trunks to provide protection against sun-scald, borer attacks, and the ravages of rabbits and field mice.

It is an established fact that rodents will not molest anything containing asphaltum. The successful planting of trees has been done on a larger scale in recent years than ever before, due to the scientific handling and proper preservation of their trunks.

Danger resulting from sun-scald to thin bark trees when transplanted is frequently serious if the trunks of the trees are not completely covered. The open wounds offer places for insects to deposit their eggs.

Waterproof Kraft Spirol Wrap not only provides protection against sun scald, but prevents adult boring insects from laying their eggs any place on the bark.

Provides security against frost and cold, and protection against the ravages of rabbits and field mice.

Rolls are 4 in. wide, about 155 lineal ft. 8 in. diameter, and weighs about 2½ pounds. Price per roll, 70c; 5 rolls, \$3.00; 12 rolls, \$6.00. One roll will do about 30 small trees.

HARDY PLUMS

GERMAN PRUNE

The most delicious of all Plums. Extra large size, often 2 inches in diameter. Early and abundant bearer. Combines hardiness, immense size, delicious quality, long keeping, beautiful color, small pit.

An early and pro-

lific bearer, often producing a good crop in two years after planting.

YELLOW EGG—European

Fruit very large, prune-shaped, yellow with red dots. Fine for the table or cooking. Ripens last of August.

RIENE CLAUDE (Green Gage) — European

Large, round, greenish yellow Plum with a marvelously sweet flavor. Almost lacking in acid. Tender yellow flesh. Improved Green Gage. Hardy, regular and heavy cropper.

UNDERWOOD—American (Hardy Hybrid)

This is the earliest of the large new Plums. Ripens from about August 1st to 15th, and attains a size of 1 3/4 inches. The tree is one of the strongest growers of all these new Plums and gets to be very large, furnishing a large bearing surface to produce wonderful crops of beautiful fruit. Fruit is very attractive; red, firm, juicy flesh, very small pit, freestone. Splendid quality.

WANETA—Prof. Hansen's Masterpiece

Has absolute hardiness, immense size, delicious quality, keeps well, is of a beautiful red color, yellow flesh, small pit, and starts to produce large crops at even two years old. A 4-year-old Waneta Plum tree has been known to bear four bushels. We can furnish these trees in 2-year-old and also 3-year-old.

BURBANK—Japanese

Large, round, golden and maroon Plum overspread with pretty bloom. Flesh is golden, sweetly and richly flavored, of fine texture

Stanley Prune

and firm quality. One of the best for big crops, hardiness and dependability. Delicious fresh or canned or in jelly. Popular midseason shipping sort.

STANLEY PRUNE

This variety is a cross between Agen and Grand Duke. Excellent for cooking or eating out of hand. The tree is healthy, vigorous, and produces full crops annually. The fruit is large in size, prune-shape, dark blue with thick bloom; flesh greenish yellow, juicy, fine-grained, tender, firm, sweet, pleasant; quality good to very good; stone free; midseason. This is one of the outstanding new varieties.

THE NEW DOUGLAS

Claimed to be blight proof and cold resistant. Bears early, often same season planted and produces a heavy crop. A regular cropper in all soils and localities. Fruit large, smooth; beautiful golden yellow color, flecked with red and russet. Flavor delicious, very sweet, melting and juicy. Something new and better.

BARTLETT

The most popular Pear for home use and market, a leader among canning Pears. Should be in every garden and orchard. Large, golden yellow with reddish blush on the sunny side. Flesh tender, melting and juicy, with a delicious, musky flavor. Tree vigorous, erect, bears abundantly.

SECKEL or SUGAR PEAR

The best pickling Pear. Ripens in July, fine flavor and firm. Heavy cropper. Delicious eating Pear.

KIEFFER (Winter Keeper)

Large size, handsome appearance and remarkable keeping and shipping qualities. October-November.

HARDY PEARS

VEST POCKET PLUM TREES and PEAR TREES

Here is a practical novelty for you folks with a limited amount of space for planting trees. Five varieties of Plums—Underwood, La Crescent, Toka, Red Wing and Waneta, all on one tree; and on another tree five varieties of Pears—Garber, Bartlett, Seckel, Clapp's Favorite and Kieffer. Plant these trees now and gain the envy of all your friends and neighbors by being the first to have them. **11/16 inch grade, 5 to 6 ft., each \$1.50; 3 or more at \$1.40 each. Less discount. WE ALSO HAVE THESE VEST POCKET TREES IN PEACHES AND APPLES.**

BLUEBERRIES

DELICIOUS PROFITABLE VERY ORNAMENTAL

Our Blueberries are far superior to the wild Blueberry or Huckleberry. These Blueberries grow in large clusters of the most beautiful blue color, plump, tender and practically seedless. The flavor of these cultivated Blueberries is simply delicious. Bushes will grow to the height of 8 feet. The plant itself is very ornamental.

During the summer the foliage is deep satiny green, and against this background hang clusters of berries royal in their magnificence. During autumn the leaves turn bronze, and during the winter months the twigs are red. Buds are pink and open to white, bell-shaped flowers. **Two plants** should be set out to insure cross pollination, so we would not advise to set just one plant. We are offering 2-year plants that will start to bear the second year. Blueberries like these sell for 55c and 70c per quart on retail markets.

Blueberries prefer an acid soil containing an abundance of peat or other partially rotted vegetable matter. They also need a moderate supply of moisture, but good drainage. In other words, water must not stand where they are planted. If your soil is not already acid, this condition can be created by mixing in the soil, old sawdust, pine needles, or soil from the bottom of old wood piles. But the very best thing to use is our SODUS ACID HUMUS. This is a sour fertilizer you should use for Blueberries, Evergreens, Azaleas, Rhododendrons, or any shrub that requires an acid soil.

DIRECTIONS for the use of SODUS ACID HUMUS for planting Blueberries or other plants that need an acid condition: Dig a hole large enough for the roots to have a full spread on the bottom, so the ends of the roots do not turn up. Have the hole at least six inches deeper than needed. Then pour one gallon of SODUS ACID HUMUS in the bottom with an equal amount of the top dirt, mix this thoroughly before putting the plant in place. Then use another gallon as you fill the hole up. If the soil is poor, use more of the Sodus Acid Humus. You will be pleased with the results.

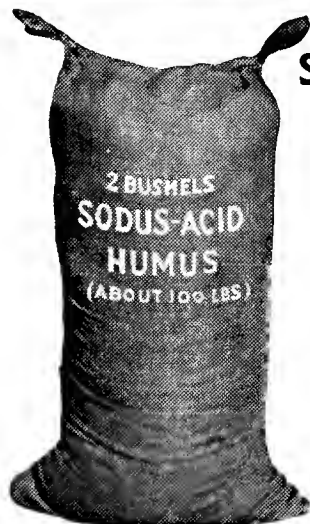

Price: 2-bushel bag (about 100 lbs.), \$1.00, no discount. Carload prices on request.

3-, 4-, and 5-yr. plants are full of buds which will bloom this season.

The 4-yr. and 5-yr. sizes come Balled and Burlapped. We reserve the right to substitute Blueberry varieties. 1-yr., well-rooted plants \$20.00 per 100.

SODUS ACID HUMUS

Sodus Humus will hold moisture and has the same fertilizer value as Soilmaster—the only difference between the two is that one is sour and the other sweet. We recommend this Humus for evergreens, rhododendrons, and blueberries, or any shrub or ornamental that requires an acid soil. See Soilmaster, page 21.

PRICE

of Sodus Acid Humus

2-bu. bag for \$1.00, net—not subject to any cash discount. We will ship by freight collect unless otherwise instructed. We do not sell less than a bag.

BLUEBERRY VARIETIES

We can supply Blueberries this year in the following varieties: Rubel, Harding, Rancocas. We reserve the right to substitute if we happen to be out of one or the other.

RUBEL. One of the most vigorous growers, upright, very good grower, and the heaviest producers of them all. Fruit is large and bears in long clusters. Good shipper. Leaves turn red in fall. Very ornamental. Fruit borne in clusters. Midseason.

RANCOCAS. Vigorous, upright grower. Very productive. Fruit sweet and fine flavor. Ornamental. Fruit borne in clusters. Midseason to late.

HARDING. This is the sweetest of them all. Spreading bush. Very productive. Berries are a little too soft for long distance shipping, but fine for home use. Fruit not borne in clusters, but all over the bush. Late ripening season.

GRAPE VINES

CACO

The New Red Grape

This is the new, quick growing, young bearing, early ripening, deliciously sweet, big red Grape that has created sensations in nearly all of the large Grape growing centers of the country.

As a variety for home use, leading horticulturists and experiment stations claim it has no equal, and we will vouch for this statement.

Caco has a peculiar characteristic not found in any other variety, in that it is so rich, melting, sugary and excellent in flavor that it can be eaten with rare enjoyment fully 2 weeks in advance of being fully ripe. In appearance it is the most beautiful of all hardy Grapes, possessing a rich wine-red and amber coloring. The berries are usually large; bunch large and compact.

The vines are very strong, perfectly hardy, vigorous growers, healthy and prolific; ripening as it does early in September, the big crop is fully matured before danger of frost.

Always in demand on all markets at extra fancy prices. If you have a roadside stand, you will make money with Caco. They will be back for more.

FREDONIA

This new Black early Grape was originated by the New York Experiment Station and it's a dandy. The bunch and berries are large, compact and well shaped. The flavor is excellent, and it is just the variety you should plant for home use as well as for commercial purposes. It will replace the Concord as soon as plants are available. It ripens 15 days before the Concord, and is an excellent shipper. Every Fredonia plant you set out will be a life-time investment.

Caco

DELAWARE (Red)

A rich and delicately flavored little red Grape that is generally recognized as the standard of quality to judge other Grapes by. An exceptionally desirable variety for home garden on account of its compact habit of growth. Commands a premium in all the markets, often selling for twice the price of Concord. Very hardy. Ripens here about the middle of September.

MOORE'S EARLY (Black)

Ripens about two weeks earlier than Concord; large berries and bunches. Excellent for home use and market, and does not winter-kill.

NIAGARA (White)

This is the Great White Grape that succeeds everywhere and under all conditions. In fact, it is really the White Concord, as it seems to have all the good characteristics of that great variety, being equally as vigorous, hardy, and productive. Due to the tough, leathery foliage, Niagara is practically immune to fungous diseases. It is one of the most delicious and beautiful of hardy Grapes and sells at fancy prices. Berries are large; bunches large and compact; color greenish yellow when fully ripe; juicy, sweet and delicious. Whether planting for home use or market, include Niagara in your order.

CONCORD (Blue)

Concord is without doubt the most productive, the most popular and profitable variety yet introduced. It is the standard of excellence, quality and comparison on all markets, and buyers everywhere pay a premium for this superior quality Grape. Concord is perfectly hardy, having withstood a temperature of 30 degrees below zero without injury, it will produce more fruit per acre than any other variety and does well on light or heavy soil. The bunches are large and compact, berries large, bluish black color; sweet and juicy; fine quality and flavor. In fact this variety is the one all-purpose Grape.

Concord

Golden Muscat

This new hardy California Grape can now be grown in every section of the country. This variety is the result of the cross of the Muscat Hamburg and Diamond, which are very desirable in themselves. This cross makes a very hardy, heavy bearing vine, and the quality of the fruit is similar to the white California Grape sold at all fruit markets. The berries are large, sweet and meaty, making it a wonderful variety to grow for home use and roadside stands. The bunches are large, heavy, broad shouldered, and tapering. Very compact. On account of this Golden Muscat being such a productive plant, we advise a good complete commercial fertilizer every spring, and you will be delighted with the crop. Supply of plants still limited. We offer nice, strong, 1-year-old, No. 1 plants. Will bear year after set. **Price, \$1.25 each; 2 for \$2.25; 5 for \$5.00.**

Golden Muscat

HORSERADISH

BOHEMIAN HORSERADISH. Crown and clump plants will make usable roots first year. Horseradish will grow any place but likes a low rich soil best. Valuable for relishes and appetizers. Dig and grate roots early in the spring. We offer roots, crowns, and whole clump plants. The roots should be planted straight up and down, with top a half inch below the level of the ground. A new crown and leaves will form immediately on these roots. Crowns are one-year-old plants with most roots removed. Whole clump plants are one-year plants with all the roots left on. **Prices: Roots, 6 for 35c; 12 for 55c; 25 for 75c; 100 for \$2.00. Crowns, 6 for 60c; 12 for \$1.00; 25 for \$2.00; 100 for \$5.95. Whole clump plants, each 20c; 6 for 90c; 12 for \$1.50.**

Mary Washington Asparagus

Rustproof

100 1-Year Roots \$1.00
Less Discount

There is no variety of Asparagus as good as Mary Washington, and whether for home use only or for market, you cannot afford to grow any other. This wonderful new Asparagus was developed and introduced by the U. S. Dept. of Agriculture, and although a recent introduction, it has become famous the country over.

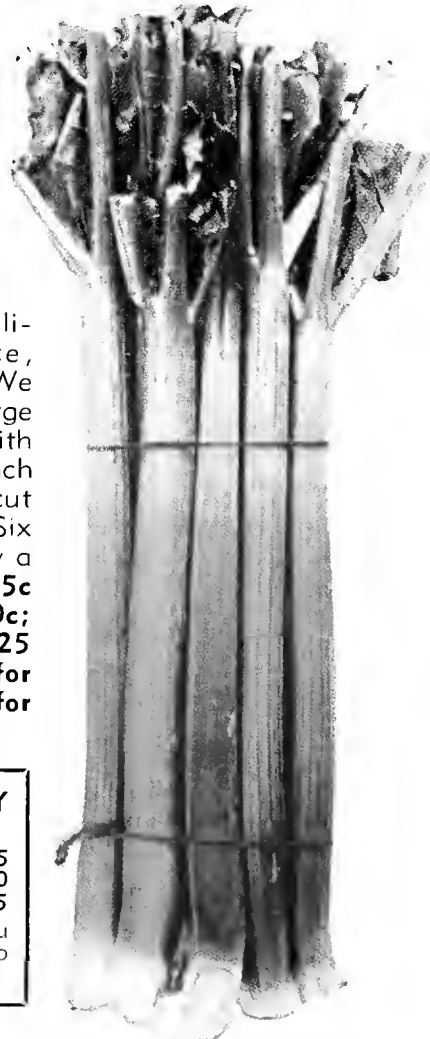

Growers everywhere are discarding all other varieties in favor of Mary Washington, because it is earlier, the stalks are larger, more tender, more productive than any other variety, and last but not least, MARY WASHINGTON IS IMMUNE FROM RUST.

HANSEN BUSH CHERRY

The New
QUICK-BEARING CHERRY

**EASY TO GROW
SURE TO PRODUCE**

**Highly Productive—Good Flavor
Hardy Everywhere**

**3 for
\$1.00**

Though the fruit of this new Cherry much resembles a Plum in size and shape, it comes massed in clusters and at times almost completely covers the limbs. The tree itself grows in a sort of dwarf bush-like shape, rarely getting over four or five feet tall. In landscape planting these Bush Cherries are also desirable as they are of striking ornamental value.

Plant These Hansen Bush Cherries Because:

- 1—They are so easy to grow and are perfectly hardy everywhere.
- 2—Are good to eat fresh, and make delicious preserves.
- 3—Bear from the ground up, early, heavy, and annually.
- 4—Are dwarf growing, bushy, and take up little room.
- 5—Excellent for hedges, ornamental shrubs and erosion control.

Fruits in one year. Large three-year-old **Bush Cherries**, ready to bear this year. **Prices:** Each 50c; 3 for \$1.00; 10 for \$2.50; 25 for \$5.00; 100 for \$15.00.

MIXED GLADIOLUS

This collection is made up of twenty different varieties and colors. We offer you blooming-size bulbs. This mixture is just a little better than the average mixture that is offered. **We offer you 75 fine sure-to-bloom bulbs for \$1.00; 25 for 50c; 100 for \$1.35; 1000 for \$9.00, postpaid.**

GIANT SIZE BULBS MIXED

This mixture is fully as good as the above offer and is the same except the bulbs are of giant sizes. Some of these bulbs will send up 3 and 4 spikes instead of just one. **25, \$1.00; 50, \$1.75; 75, \$2.35; 100, \$2.90, postpaid.**

MIXED PEONIES

Here is a mixture of red, white and pink Peonies that sold for \$2.50 to \$10.00 per root a few years ago when first introduced. All named and double. Often bloom same year set out, and a full crop of blooms the next year. We are digging a surplus of about 5,000 of these plants to be divided into clean, state-certified, 3- to 5-eye divisions. Not a lot of old club roots. The planting is only 3 years old. While they last at the following prices.

SPIREA BILLIARDI. Long spikes of deep rose-colored flowers from June to September. Grows 4 to 5 feet tall. 18-24 in., each 20c; 3 for 50c; 10 for \$1.50.

HYDRANGEA A. G. (Hills of Snow). Large blooms open in June, last all summer. 18-24 in., each 30c; 3 for 85c; 10 for \$2.50.

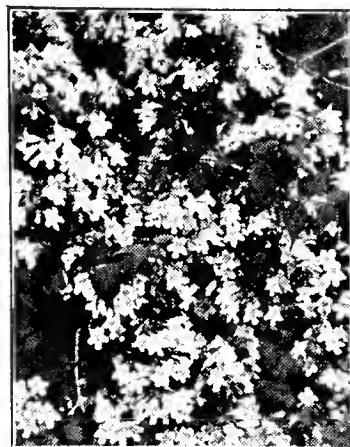

HYDRANGEA P. G. Flowers extra large, white turning to pinkish purple. Makes fine winter bouquets. Blooms July to October. 18-24 in., each 30c; 3 for 85c; 10 for \$2.50. (3-yr., 2-3 ft., each 45c; 3 for \$1.25; 10 for \$3.50.)

SPIREA VAN HOUTTEI. Branches droop to the ground with small white flowers early in the spring. Foliage makes it beautiful all summer. 18-24 in., each 15c; 3 for 40c; 10 for \$1.00. (3-yr., 3-4 ft., each 35c; 3 for \$1.00; 10 for \$2.50.)

HIGHBUSH CRANBERRY. Clusters of white flowers in April-May followed by scarlet berries which hang on all winter. 18-24 in., each 35c; 3 for \$1.00; 10 for \$2.50.

BEAUTY BUSH. Covered early in May with the utmost profusion of small, bell-shaped, clear pink flowers with brownish spots and veins. 18-24 in., each 35c; 3 for \$1.00; 10 for \$2.50. (3-yr., 2-3 ft., each 50c.)

FLOWERING QUINCE. Early blooming shrub with brilliant scarlet blossoms. Foliage dark glossy green. 18-24 in., each 35c; 3 for \$1.00; 10 for \$2.50. (3-yr., 2-3 ft., each 50c.)

SPIREA ANTHONY WATERER. The bright pink flowers are borne in full, flat clusters on erect stems in June and July. 12-15 in., each 20c; 3 for 50c; 10 for \$1.50.

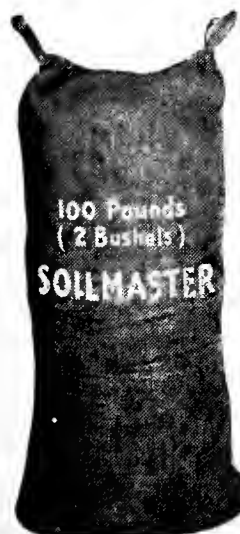

SNOWBALL. The old-fashioned variety, well known to all. In May the balls of pure white flowers cover the bush. 18-24 in., each 35c; 3 for \$1.00; 10 for \$2.50.

WEIGELA ROSEA. Beautiful pink, trumpet-shaped flowers May to July. 18-24 in., each 20c; 3 for 50c; 10 for \$1.50. (3-yr., 2-3 ft., each 35c; 3 for \$1.00; 10 for \$2.50.)

SYRINGA, VIRGINAL. The flowers are very large, pure white, and so fragrant that just a spray will perfume an entire room. Blooms profusely in June. 18-24 in., each 35c; 3 for \$1.00; 10 for \$2.50.

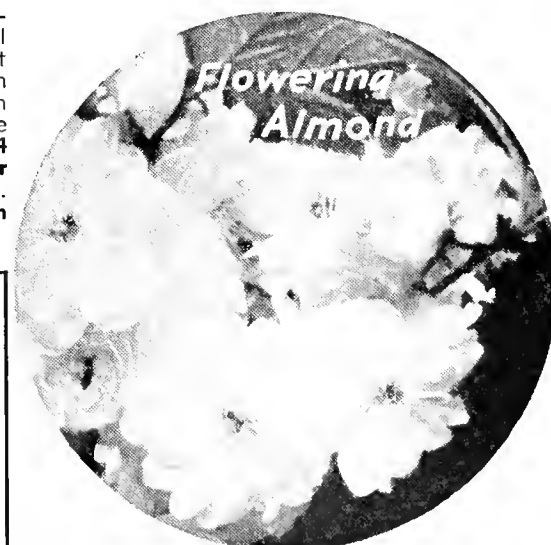

SOILMASTER

Soilmaster is a decomposed, concentrated leaf-mold and decayed vegetation. This is the humus to use on lawns, around shrubs and in your garden. Holds seven times its weight in moisture, and is a good fertilizer. Rejuvenates gardens, lawns, shrubbery and trees; is a natural plant food, a natural soil builder; far superior to stable manure, has the same fertilizing value, is clean, odorless and does not burn; and can be applied any time and anywhere. Is ideal for the farm home, garden or suburban home. Requires less water after application than other fertilizer as it holds moisture for an indefinite period. Makes the soil mellow and prevents baking. Soilmaster goes farther, lasts longer and is more economical; two-bushel bag, which is approximately 100 pounds, is enough for 100 square feet of lawn or eight good-sized shrubs or ornamentals. You are assured of a 3-year's growth in two years time by using this humus. Price, \$1.00 for 2-bushel bag. Shipped by freight collect, no discount.

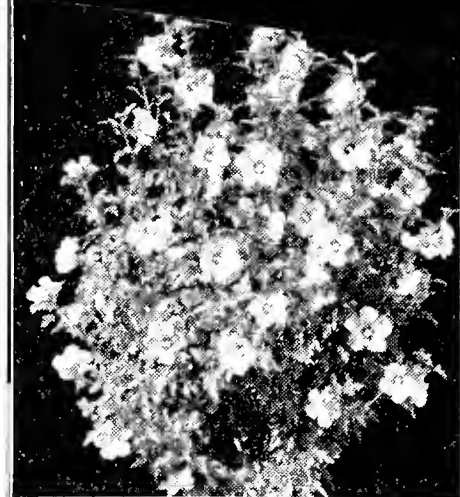

FLOWERING ALMOND. Pink. Small shrubs, upright branches covered with double pink flowers in May. Blooms before leaves come. 18-24 in., each 35c; 3 for \$1.00; 10 for \$2.50. (3-yr., 2-3 ft., each 45c.)

BUDDLEIA, ILE DE FRANCE

A splendid, vigorous variety carrying throughout the summer masses of brilliant rosy violet-purple flowers on long spikes. One of the best. 2-yr., each 35c; 3 for \$1.00; 10 for \$2.50.

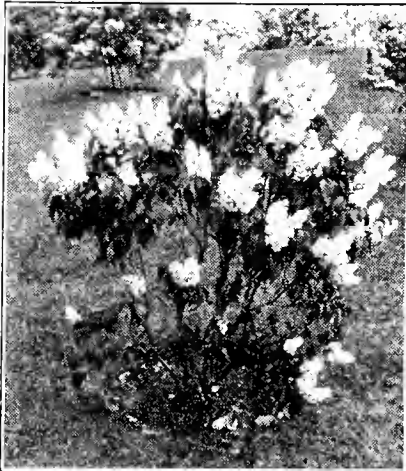

RED-LEAF BARBERRY. Foliage is brilliant blood-red in spring. The color holds all summer in sun, but in shady places it becomes a beautiful bronzy green. Red berries that remain until spring. 12-18 in., each 30c; 3 for 75c; 10 for \$2.40.

ALTHEA. Strong, erect-growing shrubs of easiest culture, perfectly hardy and a prolific bloomer. Large showy flowers in late summer. 2-3 ft., each 35c; 3 for \$1.00; 10 for \$2.50. Mixed colors.

FORSYTHIA, Golden Bell. Earliest blooming. Lights up the garden with masses of yellow flowers, often before the snow is gone. 18-24 in., each 20c; 3 for 50c; 10 for \$1.50. (2-4 ft., each 50c; 3 for \$1.25.)

PERSIAN LILAC. A decided improvement over the common Lilac. Does not sprout so much from the roots. Height 5 to 10 feet. Flowers bright purple. Blooms in May and June. 18-24 in., each 25c; 3 for 60c; 10 for \$1.90.

AMoor RIVER NORTH PRIVET. This is the hardiest of all hedges, and one of the most beautiful. Foliage dark glossy green. Leaves stay on long into the winter. 3-yr., 2-3 ft. heavy, each 10c; 3 for 25c; 10 for 75c; 25 for \$1.75; 100 for \$6 60.

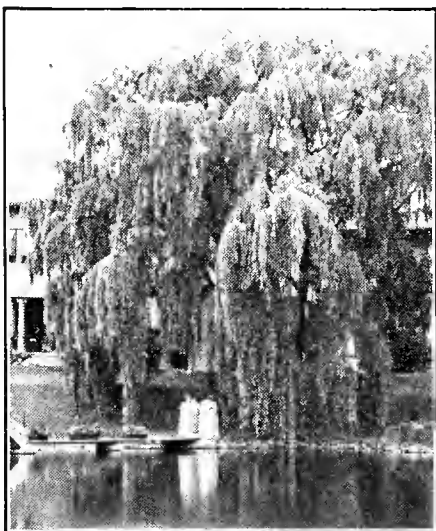

TAMARIX AFRICANA. Tall shrub, 8 to 10 feet high, with fine feathery foliage and small, bright pink flowers, in slender racemes in April and May. 3-yr., 3-4 ft., each 35c; 3 for \$1.00; 10 for \$2.50.

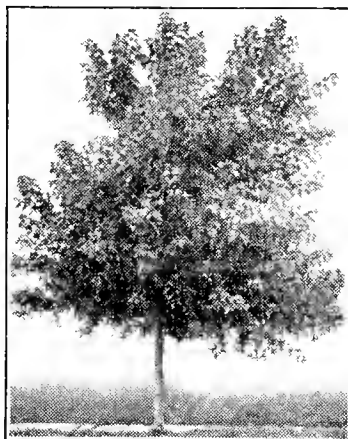

Ornamental Shade Trees

BLACK WALNUT. One of the noblest of our native forest trees, in great demand for planting. 4-5 ft., each 35c; 3 for \$1.00; 10 for \$3.00.

Weeping Willow

SILVER MAPLE. Rapid growing, producing quick shade. Leaves indented, bright green above, silver beneath. 8-10 ft., each 80c; 2 for \$1.50.

Cut-Leaf Weeping Birch

NIOBE WEeping WILLOW (Yellow Bark). A large tree with long, drooping branches. Very hardy. Fine for parks, rock gardens or along streams. 5-6 ft., each 55c; 2 for \$1.00.

CUT-LEAF WEeping BIRCH. A graceful white-barked tree with drooping limbs, and cut-leaf foliage. 5-6 ft., each \$1.60; 2 for \$2.75.

CHINESE ELM, Shade Tree. One of the most rapid growing trees. Very durable and hardy. Compact habit of growth with small attractive leaves. 6-8 ft., each \$1.00; 2 for \$1.75. 4-5 ft., each 40c; 2 for 75c. 3-4 ft., each 25c; 2 for 45c. 2-3 ft., each 10c; 3 for 25c; 10 for 60c.

Chinese Elm

LOMBARDY POPLAR. Attains a height of from 50 to 60 feet. Well known and remarkable for its erect, rapid growth, and tall, spire form. 2-3 ft., each 10c; 3 for 25c; 10 for \$1.00. 4-5 ft., each 25c; 3 for 60c; 10 for \$1.80. 8-10 ft., each 75c; 3 for \$2.00; 10 for \$5.00.

BOLLEANA POPLAR. Similar to the well-known Lombardy Poplar in habit, but broader, and like it, useful in breaking the monotony of lower round-topped trees. 5-6 ft., each 65c; 2 for \$1.25; 10 for \$5.00.

The Best New Hardy CHRYSANTHEMUM

SENSATIONAL NEW HARDY CHRYSANTHEMUM HARVEST GOLD

Only once in a lifetime is a really spectacular new garden flower produced. We are proud to present the flower sensation of the century in Harvest Gold. Just imagine the breath-taking beauty of 1200 flowers on one plant the first year. Be the first in your neighborhood to have this gorgeous new flower. Prices,

50c each 3 for \$1.25

Postpaid

BRONZE CUSHION. Just imagine 1000 blooms of rich bronze open at one time. This plant will create a sensation in your neighborhood—and several plants will make the most gorgeous flower border ever seen. Remember, the plants are perfectly hardy and will live for years.

30c each, 3 for 75c

Postpaid

WHITE CUSHION. Each plant is a whole garden in itself. Flowers open a very delicate pink at first, turning to white with a faint yellow center. The hundreds of brilliant and showy flowers literally remind one of a ball of snow. Every garden should have White Cushion.

30c each, 3 for 75c

Postpaid

RED CUSHION. Here is the most brilliant of them all. Each flower is a brilliant dazzling red and with its myriads of blooms open at one time creates an impression that is indescribable. Red Cushion is almost frost-proof—the flowers continuing to open during heavy frosts.

30c each, 3 for 75c

Postpaid

NEW CRIMSON KING CARNATION

Gorgeous New Hardy Clove-Scented Carnation. Makes brilliant display of red blooms from early June to November. Flowers produced on 18- to 24-inch stems, each stem carries several blooms and as the plant enlarges with age it gives a dazzling effect to your garden. Don't miss this—supply limited—so order early. Strong plants,

30c each, 3 for 75c, 6 for \$1.25

BLUE HYDRANGEA

This Hydrangea has been the most desired of all the Hydrangeas offered to the trade. It blooms in great profusion.

This Hydrangea is a Japanese type that blooms pink flowers on the 1-year stems, followed by blue flowers on the 2-year-old wood. In other words, it is necessary to have 2-year-old wood to have the blue Hydrangea.

Blooming size 40c each, 3 for \$1.00

5 New Cushion 'MUMS

**SPECIAL OFFER One each of the 5
Cushion 'Mums for \$1.25, postpaid**

In recent years no plants have created more interest than the Cushion Chrysanthemums. The plants are dwarf and spreading in growth, very hardy, and produce more flowers than any other chrysanthemum. When well established, single plants have been known to have 1500 flowers open at one time. The plants commence to flower in August and continue to be a mass of blazing glory until late frosts. We are fortunate in being able to offer new colors in the Cushion 'Mums this year—and by all means, do not overlook the new golden yellow Cushion variety, Harvest Gold.

PINK CUSHION. This 'Mum has been more highly praised than any plant we have offered for a great number of years. Grows to washtub size the first year with loads and loads of gorgeous flowers. Hundreds of beautiful salmon-pink blossoms may be used as cut flowers without making an impression on the plant.

30c each, 3 for 75c

Postpaid

NEW HARDY

RUSSIAN VIOLET

A beautiful rare new violet that is becoming very popular. Large, violet-blue flowers with exquisite fragrance. Perfectly hardy anywhere. May be grown in full sunlight or in a shady location. A really fine new hardy plant. 35c each; 2 for 65c; 6 for \$1.50, postpaid.

Norway Spruce

Chinese Col. Juniper

Colorado Blue Spruce

GINKGO BILOBA (Maidenhair Tree)

The oldest living thing. Known as the living fossil, the Ginkgo is rapidly gaining in popularity. It is one of the most satisfactory trees for planting under congested conditions as it is able to withstand smoke, gas, and adverse growing conditions. It is widely favored as a street tree. This is a deciduous tree which drops its leaves after the frost. **Prices:** Each 25c; 2 for 45c; 10 for \$2.00.

Plant *Stromer's* Baby Evergreens

VIRGINIANA JUNIPER. This native variety when trimmed makes a very attractive tree and thickens its foliage more by shearing.

BLACK HILLS SPRUCE. This is one of the most hardy of all the Spruces. It grows usually symmetrical, compact and bushy, and shows good characteristics even in the small trees.

MUGHO PINE. Dwarf Pine of low, thick, bunchy habit. Dark green foliage throughout the season. Very hardy and holds its color well.

NORWAY SPRUCE. Dark green foliage throughout the season, always holds its color well, grows well in most any location. Very hardy.

SPINY GREEK JUNIPER. Is of fine glaucous color and is well adapted for foundation plantings, rock gardens, or other situations where small or dwarf trees are required.

COLORADO BLUE SPRUCE. A very hardy evergreen. One of the most beautiful for landscape work. Foliage is greenish blue to silvery blue. Should be set in open sunlight, not too near other trees and buildings for best color.

CHINESE JUNIPER. A native Juniper of Asia where it covers large areas. The needles are sharp and prickly, light green, bluish cast.

PYRAMIDAL ARBOR-VITAE. This variety has dark green foliage. Very hardy. Grows thick and makes a pyramidal growth from the ground up. Does not get very broad at the base, but grows naturally in a columnar shape.

PFITZER JUNIPER. Thrives under many conditions; it does well in open, sunny places as well as in shady or protected places. Forms a thick, bushy mass of silvery foliage.

STROMER'S COURT OF FIVE BEAUTIES

EDITOR McFARLAND. Exceptionally fine sparkling bright pure pink. Free blooming and vigorous.

E. G. HILL. Bright scarlet flowers on long stems. Double, with long buds. Fine foliage of excellent texture. One of the best reds.

ETOILE DE HOLLANDE. Its gigantic flowers of velvety crimson color hold up remarkably well, getting lighter in shade instead of "bluing" with age.

MRS. E. P. THOM. H. T. Superior yellow garden Rose. The fine long buds are perfectly shaped. Flowers rich lemon-yellow.

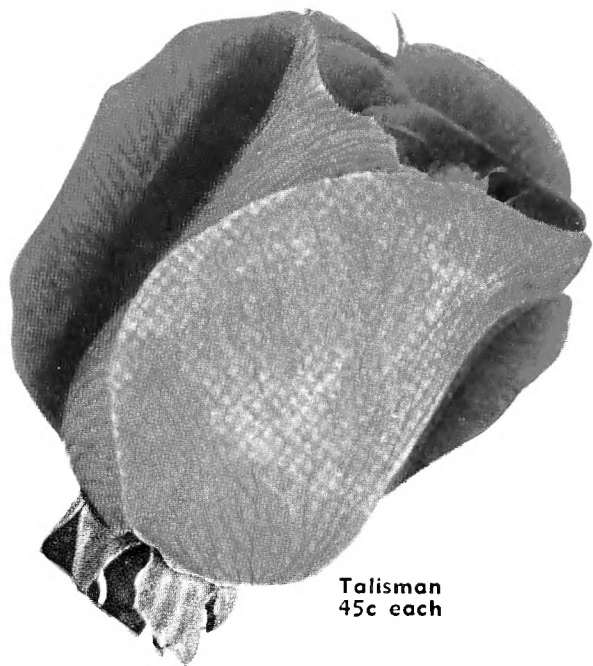

TALISMAN. Glorious combination of orange, yellow, and rose-red. The fragrant flowers are much more highly colored in autumn.
